

RETRO-FIT WORKS AND PRINCIPAL CONTRACTOR

DETAILS

Project Length: 12 Weeks
Project Type: Fitout works to live building
Project Works: Building, M&E, Client Spec Fitout

Peak Evolution were awarded the contract to install a new Comms Room within a live building keeping day to day operations still possible. This included a new 3 phase supply backed up via generator, new structured data cabling throughout, new air conditioning units and removal of radiant panel heaters. All designed and carried out with our in-house team providing the client with a fit out package from design to completion.
